Solocast™

MATCHING:

Pattern can be matched side-to-side or can be rotated 180 degrees and matched. For a complete random pattern it is encouraged to mix up the rotation with matching. It is also recommended to stagger the sheets from row-to-row, this is done by using partial sheets that have been cut to start the next row in order to stagger the pattern. This also eliminates waste. Patented Formliner Bridge Inserts (FBI), Joint Stickers and Joint Tape are required to make this pattern seamless.
